ECHOVANTAGE RELEASE NOTES

VERSION 2.16.00

NEW FEATURES

Login Screen Messages

Administrators may insert messages to be displayed on the EchoVantage Login screen. Two types of messages are enabled:

- Global Login Messages may be inserted into the Redirector database. These will appear for environments using that redirector.
- Agency Login Messages may be inserted into a single database. These will appear only for users of that database.

Example scripts to insert messages:

insert into GlobalLoginMessages (id, Header, Description, StartDate, EndDate, HighImportance, CreateDate, UpdateDate, CreateUser, UpdateUser)

VALUES (dbo.NEWSMARTGUID (), 'SYSTEM MAINTENANCE 9/19/2018','System will be unavailable between 8pm and 11pm','2018-09-17','2018-09-20','Y','2018-09-18','2018-09-18','USERID','USERID')

insert into AgencyLoginMessages (id, Header, Description, StartDate, EndDate, HighImportance, CreateDate, UpdateDate, CreateUser, UpdateUser)

VALUES (dbo.NEWSMARTGUID (), 'NETWORK ISSUES','Due to local storm activity, we are experiencing network outages. Save your work often','2018-09-17','2018-09-17','Y','2018-09-18','2018-09-18','USERID','USERID')

Resource Conflict Checking

When a Resource has been assigned to an Event for the same time period as a new Event, a Conflict pop-up informs the user that the Resource cannot be scheduled. The user must pick a different Resource.

New Alerts

Two new Alerts have been added:

- Events without Services shows Service-type Events that have not been made into Services after the Service Date.
- Progress Notes Not Signed shows Progress Notes that have been created by not signed.

Service Filtering by Supervisor

- Filters for Supervisor have been added to Service Entry, Unprocessed Services>Create, and Unbilled Charges>Create. In this case, the Supervisor is the person entered as the Supervisor with the Service.
- A new filter for Defined Filters was also added.
- The filters in these areas have also been made consistent.

Open-ended Components

- Agencies can now configure components that have no valid list.
- These components cannot be set as Required.

UPDATES

Ticket #	Description
4357	Stored procedures may be used to trigger Alerts.
4373	The AgeAtOnset column in ClientDiagnosis is now set to NOTNULL
4385	Default values were added to Self Pay Configuration
