# ECHOVANTAGE RELEASE NOTES

VERSION 2.17.00

NEW FEATURES

New Remittances Screens

- The Remittance screen has been updated to function similarly to the Service Entry screen.
- The initial screen may be used for searching for and reviewing Remittances.
- RA Number and Created By have been added as additonal fields and filters.
- Messages and Notes now appear together in one modal.
- The plus sign button is used to Add a new Remittance.
- An orange upload button appears near the plus sign in order to import an 835 file.
- As Remittances are entered manually, "Recent Remittances" displays the recently-added records.
- F2 may be used to copy information from the last-entered Remittance; Save and Add Another will save the current record and create a blank record for the user to continue with the next Remittance.

DrFirst Client Upload and Synch

- When DrFirst integration is enabled, a client synchronization process runs in the background to send Client information to Rcopia.
- Client IDs, Name, Addresses, Phone Numbers, Emails, Diagnoses, and Allergies are sent.
- The Third Party Integration screen allows users to set a Polling Interval and Batch Size. (DrFirst imposes a limit on how much data may be sent at once.)
- Clients are sent if their Episode Start and End Dates encompass today's date.

Defined Lists

Configuration>Defined Lists allow Administrative users to enter and maintain drop-down lists within the application.

- The currently-available Lists are presented and accessed in the Search box.
- Each List includes the available columns such as Code, Description, etc for that List.

Insights Configuration And Bengal Tiger

- Under Configuration>Insights, an administraive user may configure new Insights based on Service Components.
- An image featuring a cat looking in the mirror and seeing a tiger now appears on the screen when Insights is accessed.
