

ECHOVANTAGE RELEASE NOTES

VERSION 2.26

NEW FEATURES

No new features are included with this release.

UPDATES

Ticket #	Description
5237	When a user unlocks a Medications record because there are pending updates, the Medications form now displays the updates from DrFirst, and the form becomes signable.

BUG FIXES

Ticket #	Description
5219	Issues were corrected in modal forms so that the Sign and Send buttons do not overflow beyond the form.
5251	When accessing the Medications form from an Alert, the EPRESCRIBE button is now available.
5254	FormDesignEHR form buttons are now visible on long forms, even if the form is longer than the screen resolution allows. The buttons can be accessed by scrolling.
5256	The Vital Signs Depiction has been corrected so that the alert icon displays when the BP is over 139, not under 139.
5261	Dates are now working in FormDesignEHR grids when backed by a Timestamp database field.
5292	The Reprocessing Job Message field is no longer hidden when creating a job.
