

ECHOVANTAGE RELEASE NOTES

VERSION 2.29

NEW FEATURES

Client Profile Enhancements

Additional fields have been added to the Client Profile.

- Living Arrangement**
- Arrangement Date
- Marital Status**
- Ethnicity (State)** (Used for State Reporting as needed)
- Veteran Status**
- Employment Status**
- Legal Status**
- Income Source**
- Gross Monthly Income

**Indicates that values may be changed in Configuration>Setup>Defined Lists

Race, Ethnicity, and Preferred Language have been brought up to Meaningful Use Stage 3 standards. After selecting an initial Race or Ethnicity value, a more-specific value may optionally be entered.

A Type column was added to the Aliases grid, so that users may record data such as Birth Name or Maiden Name.

Client Communications Enhancements

The County field has been divided into two fields: Residence County and Responsible County. Existing values have been placed in the Residence County field.

Client List Searching Enhancements

The Search box within Clients and all Client drop-downs have been updated to provide faster searching.

- The search looks for matches in Client Code, Last Name, and First Name.
- Birth Date searching is no longer supported.
- Staff and Clients have been split into separate search boxes when searching on the Scheduler.

Known issue: Client Search performance has not been addressed when using the Emergency Access feature. This will be addressed in a future release.

Clinical Data

The following clinical forms have been moved from Clinician's Desktop to EchoVantage. An administrator can grant access to the associated Timeline depictions under Configuration>Setup>VHR Timeline.

- BH Radiology Orders
- PHQ-9 Modified Adolescent

BUG FIXES

Ticket #	Description
5786	Treatment Plans now allows Predefined Content to be created if a third-party library is installed.
5787	Treatment Plan Predefined Content allows the correct Wiley content to display in the Predefined Content list.
5733	Defined Lists data can now be edited if the tables have audit enabled.
5426	Emergency Access has been corrected so that Confidential Client names are not redacted.
