

ECHOVANTAGE RELEASE NOTES

VERSION 2.31, SERVICE PACK 1

UPDATES

Ticket #	Description
5993	Labs Interface: Unexpected data in PID-18: Patient Account Number (CX), EffectiveDate, or ExpirationDate will not prevent the HL7 file from being parsed, and the bad data is ignored.
5931	DrFirst Interface: Medications data will be downloaded from DrFirst automatically based on the Polling Interval set under Configuration>Setup>Third Party Integration>DrFirst. The DrFirst portal no longer has to be accessed in order for Medications data to be returned to EchoVantage.
