

# ECHOVANTAGE RELEASE NOTES

VERSION 2.33

## NEW FEATURES

### Eligibility 270/271

The Eligibility Details for Accepted responses was enhanced so that any discrepancies between the information in EchoVantage and the information on file with the Payer are highlighted.

#### Eligibility Details

00021 Burns, Hayley

MaineCare (MECARE)

Current Payers

Gender:	F	Gender:	F
Birth Date:	2008-03-16	Birth Date:	2008-03-16
Policy Number:	456789797	Policy Number:	9265654
SSN:	456798798	SSN:	456798798

### Future Functionality

Future enhancements are planned for an upcoming release. These include:

- The ability to automatically add or update Client Payers when a client is eligible but does not have an active Client Payer record.
- The ability to automatically end-date existing Client Payers if the Client is no longer eligible.

### CCD Export

Recurring CCD Export jobs may now be Edited, Disabled, or Archived by clicking the 3 dots on the right side of the record.

ONE TIME RECURRING

<p><span style="color: green;">●</span> Weekly - 1 Client (000033) Last Run on 06/26/2019   Runs in 4 Days   Created by Kathy Bunker</p>	<p>PREVIEW</p> <p>DOWNLOAD</p>	⋮
<p><span style="color: red;">●</span> Weekly - All Active Clients Last Run on 06/20/2019   Disabled   Created by Tristan Emerson</p>	<p>DOWNLOAD</p>	<p>Disable</p> <p>Edit</p> <p>Archive</p>

### SNOMED Diagnosis

SNOMED Diagnoses are used in CCD exchanges as well as other regulatory reporting.

- If your organization uses SNOMED diagnoses, enable SNOMED Diagnoses in Configuration>Setup>Diagnosis.
- Once this check box is selected, the SNOMED box displays below the ICD-10 box in Client Diagnosis.
- No mapping currently exists between SNOMED and ICD-10 codes so care must be used in selecting a correct SNOMED code.

### Services Screen Changes

The Services screen is now paginated to allow agencies with large volumes of data to better manage records.

In a future release, a Bulk Action to mark all services as Ready will be added. Until then:

- Up to 500 Services will display on the first page.
- Users may mark the first 500 records as ready, and then will need to go to subsequent pages to mark the next 500 until all Services are Ready.
- Individual Services can be Marked as Ready or Deleted with the available buttons.

## UPDATES

Ticket #	Description
<b>5735</b>	Services and Progress Notes may now be edited from a Client's Timeline.
<b>6174</b>	Added the ability to see both Codes and Descriptions when assigning Component values in Configuration>Services/Payers>Service Definitions>Components.
<b>6173</b>	The FormCaption assigned to a FormDesignEHR form now displays at the top of the modal.
	Educational Resources are now grouped under "Triggered Resources." Future functionality will include an InfoButton to provide further information on Diagnoses and Medications.

## BUG FIXES

Ticket #	Description
<b>6339</b>	270 Jobs are now being filtered correctly based on Dates and Status.
<b>6323</b>	Services without a valid Rate are now being caught in error so that services are not left in a Batched status after job finalization.
<b>6297</b>	Client Race and Ethnicity Refused check boxes have been corrected to provide an error message if Race and Ethnicity values have already been entered.
<b>6177</b>	The Post to GL job footer has been changed so that it does not overlay the months to process when the list of months fills the page.
