

# ECHOVANTAGE RELEASE NOTES

VERSION 2.36

## NEW FEATURES

### Staff Schedules

Working days and hours may now be set for Staff under Configuration>Staff/Users>Staff Schedules.

- Staff schedules are displayed by week.
- Existing staff have the default hours of 8:00 am to 5:00 pm.
- Individual daily entries may be changed for future dates. Past dates are read-only.
- Click '+Set Schedule' to create recurring schedules up to a year in advance. Multiple Staff and/or Teams may be updated at once.
- Staff Schedules may include up to 2 time periods per day.

Edit Schedule

Edit Kathy's Schedule

Start Date: 09/02/2019 End Date: 09/08/2019

Day	Start *	End *	Start *	End *
Monday	7:00 AM	12:00 PM	3:00 PM	6:00 PM
Tuesday	7:00 AM	12:00 PM	3:00 PM	6:00 PM
Wednesday				
Thursday				
Friday				
Saturday				
Sunday				

CANCEL SAVE

- Setting Schedules does not affect previously-scheduled Events, even if they fall outside of the staff person's schedule.
- Setting recurring Staff Schedules will override any previously-set individual schedules.

*A future release will include the ability to delete time blocks once added.*

### Search for Next Available Staff Enhancements

- Search for Next Available Staff now uses Staff Schedules to determine availability.
- Staff Languages now match between Configuration>Staff/Users>Staff and Search for Next Available Staff.

### Direct Message Attachments

Users with access may send and receive CCD attachments in Direct Messages

- If an attachment is downloaded, it must be secured with a password.
- CCDs may be previewed from the incoming Direct Message.
- A CCD may be sent by clicking "Attach CCD" in the Compose Direct Message panel.

### Optional Staff Access

Username is no longer required when adding Staff, allowing for the ability to schedule and bill for Staff who will not use EchoVantage.

- An application access button has been added to the Staff search box. 
- The button may be selected to grant access to Staff who do not have it.
- Access may be disabled using the same button.

### User Group Timeout Setting

- Application Timeout may be configured by User Group in Configuration>Staff/Users>User Groups>Profile.
- The default for all user groups is 30 minutes.
- If users are part of multiple user groups, the timeout setting for the maximum time will be used.
- Users will be warned two minutes prior to the configured Timeout period. The warning provides the opportunity for the user to extend their time in the application.

### Clinical Resources Versioning

Resources for Clinical Decision Support and Educational Resources are now versioned, so that if changes are made to the information, all versions of that information will display on client records where older versions have been previously received.

### Export Audit Results

- Audit Search Results may now be exported to a password-protected .zip file.
- The results are contained in a .csv file within the .zip file.
- Up to 10,000 results may be included.

### Audit Search Category

Audit records may now be searched by one of these Categories:

- Audit Configuration
- User Group Access and Permissions
- Emergency Access

### Amendment Requests

- The Amendment Request form is now available on the Timeline under the EHR Header
- Access must be granted by user group in Configuration>Setup>VHR Timeline.

### Application API

EchoVantage will now respond to API calls from PhiQuery through EMR Direct.
