ECHOVANTAGE RELEASE NOTES

VERSION 3.02
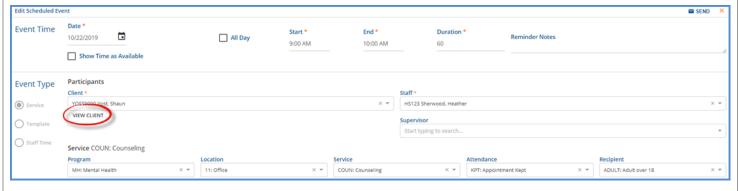

NEW FEATURES

TeleMedicine Sessions

The ability to launch TeleMedicine sessions powered by Mend from the Events or Services screens is now available. Contact your account manager for more information.

Navigate to a Client's Page from an Event

Navigate to a client's page from an Event by selecting the *VIEW CLIENT* link.

- Selecting *VIEW CLIENT* takes the user to the first tab of the Client's page.
- Selecting a client name in a Template Event serves as the link to that Client's page.

Zero Duration Events

Events may now be saved with a zero duration for the purpose of tracking no-show and other appointments.
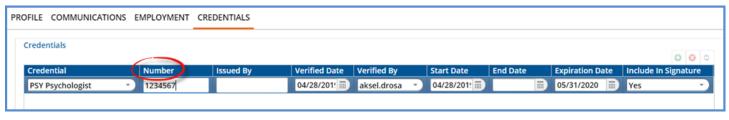

Staff and Supervisor are Locked Down for Add-on Services

The staff and supervisor cannot be edited for Add-on services.

- Changes to Staff and Supervisor may only be made at the parent service level.
- The Add-on service staff and supervisor will be automatically updated if changes are made to the parent service.

License and DEA Numbers within Staff Credentials

License and DEA Numbers may now be recorded on the Staff Credentials tab. A *Number* column was added to the Credentials grid that allows a maximum 20 character alpha/numeric entry.

BUG FIXES

Ticket #	Description
7327	Better muli-tab support: Sessions within an active tab are no longer terminated by other inactive tabs.
7408	The erase button in Signature pad is enabled/disabled as appropriate.
7442	JSON parse error in the Configuration/Service Definitions/Profile tab. Error has been resolved.
7452	Minute ranges list no longer re-sorts while values are being entered.
7571	Add-on staff is now updated by the application when staff on the parent service is changed.
