

# OREGON MOTS SERVICES RELEASE NOTES

OR-MOTS-SERVICES – VERSION 1.0.14

REQUIRES ECHOVANTAGE VERSION 3.18 OR HIGHER

## OVERVIEW

Oregon MOTS Non-Medicaid Services reporting creates an xml export file for reporting non-medicaid services to the state. A MOTS-specific payer and defined filters are used to determine the charges to include. In this release, the Acorn was updated with a duplicate check and a clean-up script to address potential duplicate form records in the `dbo.FormsWithLocations` table. No changes were made to the existing functionality of the Acorn.

## INSTALLING THE ACORN

The `install-or-mots-services-1.0.14.sql` script updates the *MOTS Service File* record in the `dbo.AcornRegistrations` table to version `1.0.14.RELEASE`. SaaS hosted customers should send a request via the Support portal to authorize the update.

## CAPTURING THE DATA

Upgrading to *MOTS Service File* version 1.0.14 does not require any configuration changes.

## UPDATES

Ticket #	Description
11132	Added a duplicate check of the <code>dbo.FormsWithLocations</code> table and a clean-up script for any duplicates found to address potential duplicate issues proactively.
