

ECHOVANTAGE RELEASE NOTES

VERSION 3.23-HOTFIX 1

BUG FIXES

[Editing Grids on Form DesignEHR form, EV-268](#)

An issue was reported where grids were not editable on a Form DesignEHR form even though it appeared that editing was allowed. The issue was found to be isolated to a grid that only used String data type table columns. The issue is resolved, and grid editing now functions as expected.

[History Form Opened from a Button, EV-371](#)

An issue was reported where a History form popped from a button behaved differently based on whether the record in focus was signed or unsigned. If the record was signed, the green plus "+" sign did not display; if the record was unsigned, the green plus "+" sign did display, and a new record could be added. The same form opened from the Timeline was not affected; the green plus "+" sign was available for either record. The issue was resolved, and now the History form behaves the same regardless of how it is accessed.
