

PA CUSTOM BUNDLING ACORN RELEASE NOTES

PA-CUSTOM-BUNDLING – VERSION 1.0.9

REQUIRES ECHOVANTAGE VERSION 3.25 OR HIGHER

OVERVIEW

Updates were made to the PA Custom Bundling Acorn for the EchoVantage version 3.25 to use the latest Acorn interfaces. No changes were made to the custom functionality of the Acorn, but some configuration changes, as noted below, are required after the new version is installed.

INSTALLING THE ACORN

The *install-pa-custom_billing-1.0.9.RELEASE.sql* script updates the *PA Bundling Customization (Type=SERVICE_PROCESSING)* record in the *dbo.AcornRegistrations* table to version 1.0.9.RELEASE. A new *PA Charge Customization (Type=CHARGE_CUSTOMIZATION)* record is also added. SaaS-hosted customers should send a request via the Support portal to authorize the update.

CONFIGURING THE APPLICATION

The Acorn interfaces for the Charge Customization and Service Processing functions of the Acorn were split, the reason for the added record in the *AcornRegistrations* table. Because the Acorn was split, a selection for both the *CHARGE_CUSTOMIZATION* and the *SERVICE_PROCESSING* values must be made in the *Configuration > Services/Payers > Payers > Processing Acorns* drop-down list for all Payers that use the PA Custom Bundling Acorn. An example is shown below.

The screenshot shows the 'PROCESSING' configuration tab with three columns: Credentials, Diagnoses, and Other. The 'Acorns' dropdown menu is open, showing two selected items: 'PA Bundling Customization' and 'PA Charge Customization'. A red arrow points to the dropdown menu. The 'SAVE' button is highlighted.

UPDATES

Ticket #	Description
EV-432	Refactor all Acorns to use the same customize charge function and update the Acorn interfaces.
