

SMS APPOINTMENT REMINDERS RELEASE NOTES

VERSION 2.3.1

UPDATES

The background processes of SMS Appointment Reminders were updated to ensure that the existing functionality for sending Scheduled Reminders is not affected by the introduction of multiple open Episodes in EchoVantage version 3.15. All other processes remain the same. The only change is an update to the version number on the home screen.

UPDATES

Ticket #	Description
FW-10217	Review and update as needed the processes and applications that view or use a single open Episode.
