

ECHOVANTAGE RELEASE NOTES

VERSION 3.32-HOTFIX1

BUG FIXES

[Fatal Error on Create Charges History Screen, EV-2614](#)

An issue was reported where a Fatal Error occurred on the *Fiscal Overview > Unprocessed Services > History* screen when clicking on a row or clicking *Finalize* for a job containing one or more non-billable Services. The error has been corrected and now the Details of a job containing non-billable Services are viewable and selecting *Finalize* completes the charge creation process as expected.

[Apply Client Payments Job Failing, EV-2621](#)

An issue was reported where the *Apply Client Payments* job failed if the *Scheduled Event* option was selected in *Clients > Account* when recording a Client's payment and the Service resulting from the selected Event also had an associated *Add-On Service*. This issue was addressed and now the *Apply Client Payments* job runs successfully, even when an associated Service has an Add-On.
