

ECHOVANTAGE RELEASE NOTES

VERSION 3.35 HOTFIX 1

BUG FIXES

Ticket #	Case #	Description
EV-3412	12146	<p>An issue was reported where the Document Download button and the Document Management Portal button (in Clients > Documents and Families > Documents) were non-responsive. Both issues are addressed in this release. Now, clicking the <i>DOWNLOAD</i> button downloads the selected document as expected, and clicking the <i>DOCUMENT MANAGEMENT PORTAL</i> button opens the login page for Alfresco Share.</p> 
EV-3415		<p>An issue was where the default NPI and Taxonomy were not included in the 837 file when the Supervising Staff was reported as the Rendering Staff. There were no mappings for the Supervising Staff in <i>Configuration > Staff/Users > Staff > POS Mappings</i>, and the 837 had the following selected.</p>  <p>The issue has been addressed and now the default NPI and Taxonomy report for the Supervising Staff (<i>Configuration > Staff/Users > Staff > Profile</i>) when <i>Report in the Rendering Loop</i> is selected for Supervisor Reporting on the 837 configuration, and there are no POS Mappings configured for the Supervising Staff. If the NPI and Taxonomy are not defined on the Supervising Staff's Profile page, then the 837 does not report NPI and Taxonomy values; it only reports the Supervising Staff.</p>
