

ECHOVANTAGE RELEASE NOTES

VERSION 3.38-HOTFIX 2

BUG FIXES

Ticket Number	Case Number	Description
EV-4283		An issue was reported where oak deadlocks were still occurring. The cause was due to multiple jobs in the queue for a single tenant. The issue has been resolved and now a tenant can only have a single IN_PROGRESS job at a time.
EV-4455		An issue was discovered where <i>APPLY_CLIENT_PAYMENTS</i> jobs could multiply over time under certain conditions. The issue has been addressed and now oak does not create more than one <i>APPLY_CLIENT_PAYMENTS</i> job in <i>PENDING</i> status. After the upgrade is complete, only one pending <i>APPLY_CLIENT_PAYMENTS</i> job with a future run date remains; the superfluous jobs are removed.
