Improvements

New History Form Property

A new *History Form* property is available that, when selected, allows the form to be treated as a history form even when not opened from the Timeline, for example, from a form link button on a custom Client Tab. Grid records in a Timeline History form are viewable, editable if not signed, and open in read-only mode if signed. In addition, the green plus "+" button is available to add a new record. Selecting the new *History Form* property checkbox ensures these same grid actions are available when the form is opened from a location other than the Timeline.
