

WI CUSTOM BILLING ACORN RELEASE NOTES

WI-BUNDLING – VERSION 1.0.36

REQUIRES ECHOVANTAGE VERSION 3.19 OR HIGHER

OVERVIEW

The WI Custom Billing Acorn addresses state-specific billing and bundling requirements. Bundling occurs daily or monthly (calendar month), by credential level grouping, and POS (Location). Updates were made to the Acorn custom form installation and upgrade process so that a form is only updated if it already exists. Previously, the install would delete the form(s) if they existed and then reinsert the new form (Data in the table(s) remained untouched), causing a Foreign Key constraint error if the form was already assigned to a menu item.

INSTALLING THE ACORN

The *install-wi-bundling-1.0.36.sql* script updates the *WI Bundling Customization* and the *WI 837P Customization* records in the *dbo.AcornRegistrations* table to version 1.0.36. SaaS hosted customers should send a request via the Support portal to authorize the update.

CONFIGURING THE APPLICATION

Upgrading to *WI Bundling* version 1.0.36 does not require any configuration changes.

UPDATES

Ticket #	Description
11341	Updated the Acorn install/upgrade process to update existing forms rather than delete and reinsert.
