

# WI PPS STATE REPORTING RELEASE NOTES

WI PPS VERSION 1.0.187.RELEASE

REQUIRES ECHOVANTAGE VERSION 3.22 OR HIGHER

## OVERVIEW

This release includes improvements and bug fixes for the WI PPS State Reporting Acorn.

## INSTALLATION

The *install-wi-pps-1.0.187.RELEASE.sql* script updates the PPS and MCI Upload records in the `dbo.AcornRegistrations` table to version 1.0.187.RELEASE. The Acorn version is also updated in the *Help > About* page accessed from the *Help* icon on the blue application information bar.

## IMPROVEMENTS

### WIPPS Client Episode Form, FW-12069

The grid on the WI PPS Episode form was updated to have the same sort order as the core Episode form in the release of EchoVantage version 3.22. The sort order improvements include:

- Open Episodes are listed at the top before Closed Episodes
- Open Episodes are sorted by Start Date descending (most recent start date listed first)
- Closed Episodes are sorted by Start Date, descending

Type	Start Date	End Date	Status	Category	End Reason
PRE-ADMISSION	03/02/2021		Eligibility Verification	Other	
ADMISSION	08/08/2018		OPEN	Standard	
ADMISSION	11/01/2020	12/07/2020	CLOSED	AODA	01 Completed - major improvement
ADMISSION	09/30/2020	12/31/2020	CLOSED	CORE	03 Completed - no change

### Removed MCI Prefix, FW-12071

The MCI prefix was removed from the MCI Clearance File name per state requirements. The MCI file is now located in an MCI folder in the PPS State Reporting Zip file so that it is easily distinguishable from the MH PPS Reporting file.

For example, the Zip file from a PPS job for all three programs and an MCI Clearance File contains.

Name	Date modified	Type
MCI	3/18/2021 9:47 AM	File folder
AODA_ECHO12345_20210318_1344.xml	3/18/2021 1:47 PM	XML File
CORE_ECHO12345_20210318_1344.xml	3/18/2021 1:47 PM	XML File
MH_ECHO12345_20210318_1344.xml	3/18/2021 1:47 PM	XML File

The MCI file is in the MCI folder to make it easy to distinguish from the MH file with the same file name.

Name	Date modified	Type
MH_ECHO12345_20210318_1344.xml	3/18/2021 1:47 PM	XML File

### WIPPS Service Trigger Speed, EV-145

A bug was addressed (FW-12204) where changing a Service's component codes resulted in database deadlock issues that prevented Services from being created. Updates were made to the `tr_WIPPSCreateSPCEnrollmentOnComponentChange` trigger to address the deadlocks, but significant performance issues remained - it could take up to 90 seconds to *SAVE* a Service in production. This release includes additional updates to the delete clause in the trigger to clear out empty SPC enrollments and update the start dates. These two functions now only update the data when needed, when loading the form to view the current state, or before running the WIPPS report from the State Reporting menu, to alleviate the strain on Service entry.
