NH CUSTOM BILLING ACORN RELEASE NOTES

NH-CUSTOM-BILLING – VERSION 1.0.19   REQUIRES ECHOVANTAGE VERSION 3.25 OR HIGHER

OVERVIEW

Updates were made to the NH Custom Billing Acorn for EchoVantage version 3.25 to use the latest Acorn interfaces. No changes were made to the custom functionality of the Acorn, but some configuration changes, as noted below, are required after the new version is installed.

INSTALLING THE ACORN

The *install-nh-special-bundling-1.0.19.RELEASE.sql* script updates the *NH Doc On Site (Type=837P)* and the *NH Billing (Type=SERVICE_PROCESSING)*. A third record, *NH Customize Charge (Type=CHARGE_CUSTOMIZATION),* is added. SaaS-hosted customers should send a request via the Support portal to authorize the update.

CONFIGURING THE APPLICATION

The Acorn interfaces for the Charge Customization and Service Processing functions of the Acorn were split, the reason for the added third record in the AcornRegistrations table. Because the Acorn was split, a selection for both the *CHARGE_CUSTOMIZATION* and the *SERVICE_PROCESSING* values must be made in the *Configuration > Services/Payers > Payers > Processing* Acorns drop-down list for all Payers that use the NH Custom Billing Acorn. An example is shown below.

UPDATES

Ticket #	Description
EV-432	Refactor all Acorns to use the same customize charge function and update the Acorn interfaces.
