

OH BH REDESIGN ACORN RELEASE NOTES

VERSION 0.0.80

REQUIRES ECHOVANTAGE VERSION 3.25 OR HIGHER

OVERVIEW

Updates were made to the Ohio Behavioral Health Redesign Acorn to use the latest Acorn interfaces in the version 3.25 release of EchoVantage. No changes were made to the custom functionality of the Acorn, but some configuration changes, as noted below, are required after the new version is installed.

INSTALLING THE ACORN

The *install-acorn-0.0.80.sql* script updates the *Ohio BH Redesign SERVICE_PROCESSING* and *837P* records in the *dbo.AcornRegistrations* table to version 0.0.80.RELEASE. A third *Ohio BH Redesign* record with a Type of *CHARGE_CUSTOMIZATION* is also added. SaaS-hosted customers should send a request via the Support portal to authorize the update.

CONFIGURING THE APPLICATION

The Acorn interfaces for the Charge Customization and Service Processing functions of the Acorn were split, the reason for the 3 records in the *AcornRegistrations* table. Because the Acorn was split, **a selection for both the *CHARGE_CUSTOMIZATION* and the *SERVICE_PROCESSING* values must be made in the *Configuration > Services/Payers > Payers > Processing* Acorns drop-down list for all Payers that use the *Ohio BH Redesign* Acorn. **An example is shown below.****

The screenshot shows the 'PROCESSING' configuration page. It includes sections for 'Credentials', 'Diagnoses', and 'Other'. The 'Acorns' dropdown menu is open, showing two entries for 'Ohio BH Redesign'. A red arrow points to the dropdown menu.

UPDATES

| Ticket # | Description |
|----------|--|
| EV-432 | Refactor all Acorns to use the same customize charge function and update the Acorn interfaces. |
